TOWN OF VERMILION PROPERTY PIN LOCATION

It is recommended for legal purposes that property owners contact a legal surveyor for property pin locations. As a convenience, Town personnel may provide property pin/boundary locations within the Town of Vermilion to the property owners but it is not a legal survey.

The Property Pin Location service is available from April 15 to October 15. Only one Property Pin Location service can be requested per owner. The service will be completed within seven business days. A fee of \$45 for staff time and equipment will be charged and there is no guarantee that the pins can be located. Where Town employees are unable to locate pins to reasonably determine the boundaries of the property, the owner shall be advised to contact a legal surveyor.

RV PARKING INFORMATION

RV owners need to be aware of regulations pertaining to RV parking in Vermilion. There are provisions for parking an RV on the street which must be followed for the safety of everyone using the roadway. An RV is allowed to park on the street for a period of 48 hours, once per 7 days, providing provisions have been met. For example, you can park your RV on the street Wednesday and Thursday in preparation to leave for camping on Friday. However, you cannot return and park the RV on the street on Sunday night expecting to keep it there throughout the rest of the week. The RV **must be attached** to a vehicle when left on the street during the 48 hour provision. It also cannot be parked in a manner which constitutes an obstruction, presents a safety concern, or impedes the progress of other users of the roadway, highway, or highway right of way. Examples of this may include, but may not be limited to: an RV which obstructs a sidewalk, protrudes into a traffic lane, inhibits motorist vision, or is parked on a crosswalk.

In addition, an RV can be parked in a residential driveway providing it does not overhang into the sidewalk/roadway. The RV could be parked on an empty lot, providing the landowner has given consent and this can be verified by Vermilion Municipal Enforcement. When an RV is parked on the street, electrical cords must be raised to a height of 2.4 metres by sturdy poles or stanchions. This will prevent the possibility of pedestrians tripping on electrical cords.

it's **BBQ** Time!
